

Web Developer

Job Overview

We are looking for an experienced mid level Web developer to join our Developers team. You will be responsible for the server side of our web applications. If you have excellent programming skills and a passion for developing applications or improving existing ones, we would like to meet you. As a Web developer, you'll work closely with our engineers to ensure system consistency and improve user experience.

Ultimately, you should be able to develop and maintain functional and stable web applications to meet our company's needs.

Responsibilities

- Participate in the entire application lifecycle, focusing on coding and debugging.
- Write clean code to develop functional web applications.
- Troubleshoot and debug applications.
- Perform UI tests to optimize performance.
- Manage cutting-edge technologies to improve legacy applications.
- Collaborate with Front-end developers to integrate user-facing elements with server side logic.
- Gather and address technical and design requirements.
- Build reusable code and libraries for future use.
- Liaise with developers, designers and system administrators to identify new features.
- Follow emerging technologies.

Skills / Qualifications:

- Proven work experience as a Web developer.
- In-depth understanding of the entire web development process (design, development and deployment).
- Hands on experience with programming languages like Java, PHP and Python.
- Strong knowledge of Spring Boot and Laravel Frameworks.
- Familiarity with front-end languages (e.g. HTML5, JavaScript, JQuery and CSS3)
- Excellent analytical and time management skills.
- Teamwork skills with a problem-solving attitude.
- BSc degree in Computer Science or relevant field.
